Runtime randomization and perturbation for virtual machines.

JAVIER CABRERA ARTEAGA

Licentiate Thesis in [Research Subject - as it is in your ISP]
School of Information and Communication Technology
KTH Royal Institute of Technology
Stockholm, Sweden [2022]

KTH School of Information and
Communication Technology
SE-164 40 Kista
SWEDEN

TRITA-ICT XXXX:XX
ISBN XXX-XX-XXXX-XXX-X

Akademisk avhandling som med tillstånd av Kungl Tekniska högskolan framlägges till offentlig granskning för avläggande av licentiatexamen i [ämne/subject] [veckodag/weekday] den [dag/day] [månad/month] [år/2022] klockan [tid/time] i [sal/hall], Electrum, Kungl Tekniska högskolan, Kistagången 16, Kista.

Contents

Contents **vi**

1 Introduction **1**
1.1 Thesis Statement . . . 1
1.2 Research questions . . . 1
1.3 Contributions . . . 2
1.4 Publications . . . 2
1.5 Talks . . . 2
1.6 Software Artifacts . . . 2

2 Background & State of the art **3**
2.1 WebAssembly overview . . . 3
2.2 Software Diversification . . . 8
2.3 Statement of Novelty . . . 13

3 Technical details **17**
3.1 CROW . . . 17
3.2 MEWE . . . 21

4 Methodology **25**
4.1 RQ1. To what extent can we artifically generate program variants for WebAssembly? . . . 27
4.2 RQ2. To what extent are the generated variants dynamically different? 30
4.3 RQ3. To what extent do the artificial variants exhibit different execution times on Edge-Cloud platforms? . . . 32

5 Results **35**
5.1 RQ1. To what extent can we artifically generate program variants for WebAssembly? . . . 35
5.2 RQ2. To what extent are the generated variants dynamically different? 38
5.3 RQ3. To what extent do the artificial variants exhibit different execution times on Edge-Cloud platforms? . . . 41

6 Conclusion and Future Work **45**
6.1 Future Work 45
6.1.1 wasm-mutate future work 45

Bibliography **47**
